

About the factory

The design aspects and quality are appreciated by parents and specialists.

Woodies Safe Dreams® – we design and manufacture beautiful wooden cots and beds for children according to European safety standards.

We manufacture furniture complying with European standards.

Safety standard for playpens: PN-EN 12227

Safety standard for cots and beds: PN-EN 716

Safety standard for cribs: PN-EN 1130

Quality and Safety for years to come.

Manufactured in Poland | Local suppliers

We design furniture with a view to your business needs.

Unique projects

Considering our youngest customers and the constantly growing requirements of their parents, we're always trying to exceed their expectations. We attach great importance to the smallest detail of the furniture, focusing on creating unique projects to please the most demanding customers. This way, we create the highest class products. Every year parents are more and more discerning. We are pleased to offer unique cots and bring new designs every year to the patent office.

We want to share our knowledge based on years of experience by manufacturing safe beds for Your children.

We love challenges and will gladly take on one with you! Our enthusiastic team of design, production and marketing specialists will provide you with a solid foundation and support in creating new brand or in distributing Woodies Safe Dreams® unique furniture. Every year, we try to innovate and expand our production team with two simple goals in mind: optimizing production time and shipping. We use our own, innovative technological solutions instead of basing them on ready market solutions.

About Woodies® Safe Dreams

Expierience, quality, design.

Woodies Safe Dreams® furniture for newborns and children – 50 years of experience in the furniture industry.

Woodies Safe Dreams® are cots and nursery furniture made by a dedicated team from Poland. The company opened in 1995 but the family behind it has 50 years of priceless experience in the furniture industry. We use every bit of our multigenerational knowledge in producing and designing new furniture for newborns and children – some of the most demanding customers in the world! We believe that parents can have peace of mind when their little ones sleep in a safe bed. We deliver our cots and beds to parents across the whole of Europe.

Our furniture is made of only the highest quality materials from local providers.

We know that by taking care of every detail at every stage of production we'll be able to satisfy and gain the trust of thousands of customers. We've designed our furniture to provide a safe and comfortable sleeping experience for newborns and children. Furthermore, our furniture wouldn't be perfect if we didn't use only the highest quality materials from our Polish suppliers. Woodies' furniture is 100% made in Poland, under strict supervision, and is certified for safety and quality. Additionally, we care about the environment around us and use only ecologically-obtained wood. That's why about a decade ago we planted a forest near our manufactory.

The trees we planted have grown into a beautiful forest. Here, a family of badgers have made a home.

We attach great importance in making our furniture not only safe, but also beautiful!

Multi-award-winning cots and beds from Woodies Safe Dreams® are a combination of safety and world-class design. We believe that a newborn should be surrounded by beautiful things from the very beginning- that's why we've chosen the Scandinavian style of design. Add to that, when we design our products, we are constantly innovating. As a result, the furniture we make is one-of-a-kind and confirmed by the patent office.

Quality and Safety for years to come | Manufactured in Poland | Local suppliers | European design

Woodies furniture is made only from the highest quality Polish materials of local providers.

The Woodies design aspects and quality are appreciated by parents and specialists. We create modern and unique projects. We are constantly innovating and the furniture we make is confirmed by the patent office.

We provide our own innovative technological solutions instead of using the ones already existing on the market.

Being a furniture industry we focus on excellent and beautiful interior design. That's why we appreciate our Instagram community which support, tag and recommend us very strongly.

We care about community and this year we have been one of the event sponsors at See Bloggers Łódź.

This year we have also supported sextuplets parents and many other children's homes because we know that sleep is the most important time for a child's development. For this reason we have been trying to make children dream in beautiful and safe Woodies® Safe Dreams beds for over 20 years.

We use our broad multigenerational knowledge for producing and designing new furniture for newborns and children – some of the most demanding customers in the world!

We care about the environment around us and use only ecologically-obtained wood. About a decade ago we planted a beautiful forest near our factory, where a family of badgers made themselves a home. This is how a Polish badger has become the Woodies logo.
